

Advanced Health & Safety Management

INTRODUCTION

- The benefits of good health and safety management for any organisation are significant.
- This Advanced Health & Safety Management training course is based upon Successful Health and Safety Management produced by the UK's Health and Safety Executive. It will provide you with everything you need to develop and sustain a genuinely successful health and safety management system.
- The Organisations must have health and safety management systems and practices that ensure risks are dealt with sensibly, responsibly, and proportionately. Effective health and safety management is not just about having a safety management system. The success of whatever system or process that is in place always depends on people's attitudes and behaviours in the organisation (referred to as the "safety culture").
- Dame Judith Hackitt, former Chair of the UK's Health and Safety Executive, stated: "There is a need for a sensible and proportionate approach to health and safety management, in short, a balanced approach – this means ensuring that paperwork is proportionate, does not get in the way of doing the job." Health and safety are managed with the same degree of expertise and the same standards as other core business activities.

This training course will highlight:

- Significant legal duties and legislation
- Successful health and safety management (HSG 65)
- Human factors and their effect on safety culture
- Risk assessments and hazard control
- Measuring performance and HAZOPS

OBJECTIVES

By the end of this training course, the participants will be able to:

- Develop and sustain an effective health and safety management system
- Understand the significant legal duties and safety legislation in Europe and the United States
- Develop the skills to manage health and safety in line with other core business activities

- Appreciate the importance of safety culture and human factors in creating a successful safety management system
- Understand risk perception and effective hazard control
- Appreciate the importance of monitoring success

TRAINING METHODOLOGY

- This Advanced Health & Safety Management training course is presented using PowerPoint presentation and videos. Case studies further enhance the learning outcome. Active participation will be encouraged so that participants can gain through the personal experiences of the group.

ORGANISATIONAL IMPACT

By developing and maintaining a successful health and safety management system, an organisation will ensure they are effectively controlling risks and enhancing their reputation and profile. The organisational impact will be the following:

- Understanding internationally accepted standards for health and safety management systems
- Staff professional development
- Improved safety systems, control, and behaviour
- Ability to reduce accidents and business losses in the workplace
- Leaders better equipped to prevent or manage adverse events
- Capacity to increase profitability

PERSONAL IMPACT

- The participants will acquire how to develop a successful health and safety management system using a variety of proven management techniques and interpersonal skills. The personal impact will be as follows:
- Understanding the core elements of a successful health and safety management system
- Appreciating the legal basis for health and safety management
- Learning how to implement a health and safety management system
- Increased knowledge in evaluating health and safety performance
- Appreciating the importance of human factors
- Understanding the benefits of a successful health and safety management system

WHO SHOULD ATTEND?

- This training course has been specifically designed to provide practical health and safety guidance. It would benefit a wide range of professionals involved in developing and implementing health and safety within their organisation. The guidance will enable those attending to apply this learning to sustain effective safety management.
- This training course is a suitably wide range of professionals but will significantly benefit:

- Senior Managers with HSE Responsibility
- HSE Personnel
- Engineers
- Maintenance Personnel
- Employee Representatives
- Human Resources Professionals
- All line Managers, Supervisors and Team Leaders
- Any other personnel who are involved in planning and implementing the organisation's HSE management system
