

Banking & Financial Intermediation

INTRODUCTION

- Banks and financial institutions play a major role in the development and stability of society. However recent events have called their role into question, with many claiming they take excessive risks. This training course examines their role and that of financial markets. We also examine the financial instruments they use such as derivatives and how companies may also use them to manage or reduce risk.
- This training course is designed to give those in the industry the skills to evaluate Credit Risk and those coming from companies in need of finance the knowledge of what banks are looking for. We also take an in-depth look at the latest financial instruments developing a detailed knowledge of Forwards, Options Futures & Swaps.

This training courses will highlight:

- The Monetary Financial System – the Role of Financial Institutions & Markets
- Banking Services
- The Bank's Balance Sheet & Income Statement
- The Provision of Credit – the Bank's Major Role
- The Financial Crisis and the Lessons Learnt

OBJECTIVES

At the end of this training courses, you will learn to:

- Evaluate the role and risks of Financial Institutions as Financial Intermediaries
- Recommend or seek appropriate Banking Services
- Evaluate a Bank's Income Statement and Balance Sheets
