

Behavioural Economics

INTRODUCTION

- This training course recognises that the world of employment has changed. The rate of change is exponential in its growth. Reshaping organisations, changing the way we work, has become commonplace; worldwide. To make better decisions and maximise talent and effectiveness, new techniques need to be used to get the best from all organisations.
- Behavioural economics is a fast-growing approach that organisations can use to maximise processes and human decisions. Thus, capitalising on effective decision making; based on facts and aided by using current case study information. This informative and engaging five-day training course will include what needs to be done and specifically how to do it, with many current practical and detailed examples. The training course does not require participants to have any previous financial skills, nor does it involve any complex mathematics.

This training course will highlight:

- The most significant changes organisations will face
- How to calculate value-added to maximise efficiency and show the added value
- How to build a psychological template for remote workers
- Understanding and mastering skills for future leadership and organisational re-profiling
- Maximising Talent in your organisation- from pay to appropriate job satisfaction
- The critical importance of Emotional well being

OBJECTIVES

At the end of this training course, you will:

- Be able to calculate and demonstrate the value of remote working for the organisation and employee
- Be able to analyse and present a case for organisational rightsizing
- Practice and demonstrate the critical need for Behavioural profiling using O.C.E.A.N.
- Understand and be able to explain to others the 6 Key leadership skills
- Design strategies to be applied in a rapidly changing environment driven by Artificial Intelligence
